

# Entrepreneurship 30

Mr. Block  
Lab 226  
Period 2

Entrepreneurship is a viable employment/career option for today's youth. It is predicted that by the year 2012, 50% of workers will create their own livelihoods, by either starting their own business or by piecing together several jobs. Creating and running your own business could be in your future!

A partnership with Junior Achievement, allowing students to initiate and operate their own business during the semester, brings this class to life! Theory put into practice gives students a firsthand look at owning and running a business.

The proposed units of study for the class include:

(Source – Entrepreneurship 30 Curriculum Guide; Saskatchewan Learning, 2004)

- Module 1 – Introduction to Entrepreneurship
- Module 2 – Case Studies in Entrepreneurship
- Module 3 – Entrepreneurial Skills
- Module 4 – Seeking Opportunities
- Module 5 – Business and Cooperative Development
- Module 6 – The Canadian and Saskatchewan Marketplace
- Module 8 – Market Research
- Module 9 – Initiating a Venture
- Module 13 – Planning a Venture
- Module 14 – Financing a Venture
- Module 15 – Evaluating a Venture
- Module 16 – Entrepreneurship and the Internet

The world is constantly changing. Young people like you need to respond to these changes in new and innovative ways. Entrepreneurship 30 provides an opportunity for you to develop your entrepreneurial ability and identify and develop personal characteristics and skills that will help you to succeed in a changing world.

Evaluation:

- Assignments, quizzes, tests – 50%
- Junior Achievement Venture – 50% (Together we will determine an evaluation breakdown for this portion of the class; it will involve things such as journal entries, the business plan itself, etc.)

**CONGRATULATIONS on accepting the challenge!**  
**Have fun . . . I know I will!**
